Agenda [Minutes 2 with Researcher]

Location: TU Library
Datum: 13/05/2022
Time: 16:00-17:00
Attendees: Daniel, Nathaniel, Diego, Kenzo(Chair), Lucas

Agenda-items

- [16:05 - 16:07] **Opening by the chair**
- [16:07 - 16:10] **Everyone is here and meeting with Client and Client Supervisor**
- [16:10 - 16:15] **[Progress] – [General progress]**
Doubt about calculating the values, Cynthia and/or Sandy will check whether the source of the formula that we found can be trusted, then they'll let us know how to proceed.
Cynthia expressed her preference on using the personality questionnaire with 60 questions.
- [16:15-16:21] **[Demo] – [Show spotify log in and song page]**
Show instructions and explanations both in Prolific and in our app.
Put personality and value scores after ratings (batch 2). → add to requirements
- [16:21- 16:23] **[Hosting] – [Tell her about server and database we have access to now]**
All good on this
- [16:23 - 16:27] **[Playlist feedback] – [Ask about 30 questions feedback for playlist]**
Sandy would like a set of questions after each playlist rating (the ones sent on Teams), but Cynthia has concerns that it will make the questionnaire too long.
Cynthia and Sandy will discuss this matter and let us know.

If she thinks that adding the questions is necessary, we'll have to change the playlist look to show a playlist per page and questions on the same page as the playlist.
- [16:27 - 16:30] **[No more changes to requirements] – [Explain that we need time for testing]**
Cynthia and Sandy agreed on the terms proposed by us.

They'll let us know by next week on what they decide for the playlist feedback questions.
Also there won't be any new requirement in the upcoming week.

[16:31 - 16:36]

[Spotify users having no songs issue] – [How to handle]

An idea would be to add a warning on prolific and, if a user logs into spotify and has no top songs (or not enough), they'll be removed from the experience.

If a certain song has no preview, retrieve more than 5 questions and use one that has a preview instead.

[16:36 - 16:50]

[Feedback/Questions] – [Anything the Client wants to discuss]

Everything looks good

Is there everything they'd like to see during the mid-term review?

Don't focus too much on presenting things that we're sure everyone already known.

Based on questionnaire, how to phrase questions (he/she stuff)
Let's just stick with "they"

Feedback textbox only all playlists pages
Labels for each playlist?

[16:50]

Closure by the chair

[16:52]

Summary action points – Who, what, when?

CS4065 - possible rooms where we could work in

Cynthia will be 15 minutes late to the midterm meeting, notify everyone about it

(add explanatory pages before questionnaires and recommendations)
