- introduction + log in
- introduction to the first questionnaire
- questionnaire 1
- intro to the second questionnaire
- second questionnaire
- (loading page)
- introduction to playlist
- playlist
- thank page

[14:20-15:00]

### **[clarifying the requirements]**

link to prolific when consent form is shown

questionnaires:

- scales for the questionnaires :
- not like me -> very like me
- values 5 ratings, personality 6 ratings
- adding on the top of the page description of the ratings
- she will search on her side possibilities

recommendations:

- order of the page together is the same as afterwards

adding the batch 0 before log in

- discuss with her afterwards if adding or not

dashboard

- download CSV file (time it was retrieved, batch number, similarity matrix)
- change batch
- similarity metrics\
- changing parameters without closing the batch should not be possible (could have)

CSV files :

- all the data
- separate CSV file with user's and top songs
- having a data set of personality values and top songs
- making an example of structure of CSV file and sending it to her
- we can decide if we want to make one or multiple CSV files

[15:00-15:01]

**Closure by the chair**
