Git Guidelines

Branches

Rules:
- Create Merge Request for all merges to dev
- Branch for every issue (from dev), then split branch into back-end and front-end
- Ensure that Merges are not too long

Naming Template: Issue number-Issue-title

Naming Example:
34-Spotify-Log-In
34-Spotify-Log-In-Backend
(use "-" for spacing)

Naming for sub-issues :
When branching from
        1-issue-example
Do :
        sub-issue-example

Commits

Rules:
- Capital
- Present SIMPLE
- Descriptive

Naming Example: Create SongController.py which stores the API endpoints for songs

If the title isn't descriptive or clear enough add a description by adding a blank line between the title and the description of the commit.
